Office Action Summary

Art Unit: 2645

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Walker et al '467.

The object of Walker et al invention is to allow callers who have been placed into a queue to access additional information concerning the subject matter of their phone call while the caller is waiting for an agent to become available. In Walker's invention an ACD at the call center determines that no agents are available to handle an incoming call and invites a caller to be placed in an interactive holding queue. Upon receiving a signal indicating the caller's willingness to be placed in the queue, announcements are then played to the caller in order to collect initial information to direct the call. The collected information enables the system to search for a similar subject already being handled by an agent. If such a call is on-going, the call is forwarded to a

switch serving the agent. The switch , in turn, allows the caller to monitor the call in progress or a previous cal which has been recorded, col. 2, lines 22-31. Once a caller has been enqueued, the caller has the option of: 1) listening-in on a live call-in-progress; 2) access and search thru pre-recorded calls in the same subject area; 3) participate in a chat room.
